CANADA MAB & CBRA

QUESTIONS

- What needs to be 'integrated' in environmental and resource management (e.g., forms of knowledge, values, cultural norms, cross-boundary interests/jurisdictions/policy, etc.)?
- What are the **opportunities** for integrated resource management in your region?
- What are the **challenges** of integrated resource management in your region?
- What are the **current** and **potential** roles of a **biosphere reserve (designation, organization)**? How do they relate to the above?
